HSM[®]

Great Products, Great People.

HSM – For More Performance: Warranty, service, sustainability – these all contribute to our understanding of quality.

Quality with guarantee

- HSM produces all document shredders in the HSM SECURIO, Pure and Powerline product ranges in Germany.
- 3 years warranty for the HSM SECURIO document shredders.
- Lifetime warranty on solid steel cutting rollers in HSM SECURIO and Pure document shredders at security levels P-2 to P-5. Cutting rollers are impervious to staples and paper clips.
- Expertise in shredding paper documents and various data storage media: CDs/DVDs, credit cards, flash memory, hard drives etc.

Energy management and environmental protection

- The principles of sustainability and a sense of responsibility apply to the products and the production process.
- The document shredders HSM SECURIO C14 / C16 and HSM Pure 120 / 220 use no electricity in stand-by.
- Thanks to the EcoSmart energy management system, the HSM SECURIO shredders C18 to B35 switch automatically to stand-by mode and are therefore always ready to use. In this mode, the power consumption is less than 0.1 W.
- The HSM SECURIO P-series ensures exceptional energy savings due to stand-by and automatic switch off functions.
- The HSM Pure shredders feature an energy management system and saves power in stand-by mode.
- Exclusive use of environmentally-friendly materials.
- Use of patented technology for maximum performance at low energy consumption.
- Return warranty: used HSM machines are taken back free-of-charge and recycled in an environmentally sound manner.

Security and comfort

- A slight pressure on the safety element prevents unintentional intake and stops the document shredder immediately.
- Anti-Jam Technology with reverse function reduces paper jams and maintains high shredding performance.
- Quiet Operation due to optimal combination of motor and cutting unit. The low acoustic level ensures a quieter workplace.

Comprehensive service

- Free-of-charge replacement or repair of all 230 V HSM SECURIO, Pure and shredstar document shredders within the guarantee period.
- Money back within 14 days if the customer is not satisfied or an upgrade to a larger machine upon payment of the additional cost.
- Consulting service for all products and data protection queries; please call +44 1543 272-480 or send an email to info@hsmuk.co.uk.

Site Salem

Site Frickingen

Site Reichenbach

We have been offering our customers “Made in Germany” quality for over 45 years.

With every HSM document shredder, you get a machine resulting from decades of experience in manufacturing document shredders. Due to its inventive spirit, expertise, high quality standards and service orientation, HSM has developed from a small machinery plant in southern Germany into one of the international market leaders in document shredders. Satisfied customers all over the world are impressed with HSM’s “Made in Germany” quality engineering from the HSM production and assembly plants in Salem, Frickingen and Reichenbach.

Hermann Schwelling founded the company from a small workshop in 1971. With a clear commitment to its sites in Germany, HSM currently employs around 800 employees all over the world: highly-qualified specialists and managers, who have a considerable impact on the success of HSM. They ensure that HSM meets the high requirements of product quality 100 %. “Great Products, Great People” – for the satisfaction and safety of HSM customers.

Hermann Schwelling
Company founder HSM GmbH + Co. KG

The best way to ensure quality is to produce it yourself.

HSM stands for quality in development and construction, production, project management and service. All HSM plants are certified to DIN EN ISO 9001 and equipped to produce sustainable products. Recyclable materials, components with high-quality materials, wear-resistant designs, energy-saving drives and functions all ensure a long service life. In this way, HSM develops products that give long term service, reliability and value to each of its customers.

HSM produces all document shredders in the HSM SECURIO, Pure and Powerline ranges in Germany.

A decisive advantage – HSM service.

We are committed to providing excellent service and we are always delighted to help our customers. This not only applies to our headquarters but also to all HSM service centres in Germany and all over the world.

Our warranties and services:

- All HSM SECURIO and Pure document shredders come with a warranty on the steel cutting rollers at security levels P-2 to P-5 for the entire lifetime of the machine (HSM Lifetime Warranty).
- Replacements or repairs are free-of-charge within the guarantee period.

- Consulting service: individual product consulting, data protection advice, service support and advice on spare part requirements.
- Training and seminars on products, data protection and service.

Find out more about our services at: www.hsm.eu/en/service

HSM supports the OroVerde Guatemala Rain Forest project with every document shredder sold.

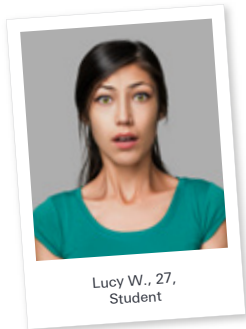

Sustainability is important to HSM.

HSM manufactures long-lasting products that operate efficiently today and will not devalue in the future. These principles of sustainability and the sense of responsibility apply not only to HSM machines, but also to the production process, material selection and use of energy within the company. For instance our packaging can be re-used. Plastic and metal waste material from our production is recycled. Since we do not use composite materials, we can sort the waste material cleanly and clearly for recycling. Because of our commitment to Germany, HSM is

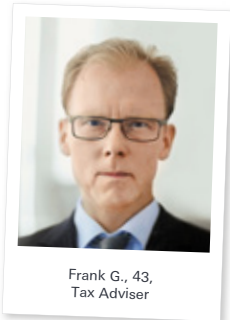

proactive in working for both local and global environmental protection.

HSM is also committed to the OroVerde tropical rain forest charity. HSM supports these activities to protect wildlife and vegetation as well as the climate. It is a small but important step towards the larger goal of preserving the environment for coming generations.

Don't make the same mistake! Shred – don't bin.

Why did it have to be me? Because I just threw the delivery note from my last order into the waste paper bin, organised criminals were easily able to place orders using my customer number and address – and I ended up paying for everything! It's the first and last time that happens to me! From now on, all documents which I no longer need but which have my personal details on them will go straight into an HSM document shredder.

Why did it have to be me? I threw my client's tax documents into the bin, a reporter of all people fished them out and made them public. I am now seriously worried about my good reputation. It's the first and last time that happens to me! From now on, all documents from a client which I no longer need will go straight into an HSM document shredder.

Why did it have to be me? I threw important development plans into the paper bin without thinking and now my company is being black-mailed. I either pay the money or the competition gets the plans. It's the first and last time that happens to me! From now on, all hard copies which are no longer needed will go straight into an HSM document shredder.

www.hsm.eu/data-protection

Data protection is underestimated!

Practically every week reports of data misuse are widespread in the news and everyone is at risk when private data gets into the wrong hands. This can result in considerable financial loss but also a loss of reputation and esteem not measurable in monetary terms. This applies to your private life as well as work. Yet companies are obliged by the Data Protection Act in UK and Ireland, or by applicable data protection laws in other countries, to handle personal data responsibly and correctly. In many companies there is no consistent data protection policy. Data protection is often not given the priority it needs to ensure that theft and misuse are prevented.

Although the EU General Data Protection Legislation (GDPR, effective as of 25 May 2018) states that infringements will be prosecuted with fines of up to 20 million Euros or 4 % of the global turnover and even imprisonment, the efforts to achieve compliancy with the legislation are often superficial. This might explain why bank statements from a bank undergoing renovation work end up on the street, grade lists from A level candidates or medical data from patients end up being found in waste paper bins.

DIN 66399 – the standard for data protection.

1 Define your protection class ...

Protection class 1

Normal protection requirement for internal data.

Protection class 2

High protection requirement for confidential data.

Protection class 3

Very high protection requirements for particularly confidential and secret data.

2 ... which leads to the security levels.

Security levels (taking paper "P" as an example)

Security level 1

General documents to be rendered illegible or invalidated, for instance old advertising material such as catalogues, brochures.

Security level 2

Internal documents to be rendered illegible or invalidated, for instance internal company communications, such as out-of-date instructions, travel guidelines, notices, forms.

Security level 3

Data media with **sensitive** and confidential data as well as **personal** data subject to **high** protection requirements, e.g. company sales reports and tax documents as well as quotations, orders etc. with private address data.

Security level 4

Data media with **sensitive** and confidential data as well as **personal** data subject to **high** protection requirements, e.g. balances and conditions as well as payslips, personal data/files, work contracts, medical reports, tax documents.

Security level 5

Data media with confidential information of **fundamental importance** for a person, company or institution, e.g. patents, construction documents, strategic papers, competitor analysis, process documentation.

Security level 6

Data media with confidential documentation requiring **extraordinary security** precautions, e.g. research and development documents, official areas.

Security level 7

For **strictly confidential** data with the highest security precautions e.g. secret service or military sectors.

To find out exactly which security level is the right one for you, just follow the three steps at the top of this page. If you have different types of data media to be destroyed, the one requiring the highest security level is relevant for determining which cutting size you need.

3 Select the data media relevant for you.

e.g. paper, x-ray films, print forms

e.g. CDs, DVDs, Blu-ray discs

e.g. floppy disks, ID cards with magnetic strips

e.g. USB sticks, chip cards, solid state drives, flash memory from smartphones and tablet PCs, memory cards from digital cameras

e.g. films, foils

e.g. hard drives with magnetic data media

Information in original size	Optical data media	Magnetic data media	Electronic data media	Information in reduced form	Hard drives with magnetic data media
P-1 ✓ Strip size max. 12 mm	O-1 ✓ Particle size max. 2000 mm ²	T-1 ✓ Mechanically inoperable	E-1 ✓ Mechanically/electronically inoperable	F-1 ✓ Particle size max. 160 mm ²	H-1 ✓ Mechanically/electronically inoperable

Collection volume: up to 130 litres	3	P-6 / F-3		SECURIO: AF500, B34, B35
	3	P-7 / F-3		SECURIO: B34, B35

TIP!

Using the DIN standard in practice:

1. **Determine the protection class** for the data you want to shred.
2. **Select the security level.** The protection class issued then offers you a choice of three security levels. The higher the security level you select, the smaller and therefore more secure the particles are shredded.
3. Check **what type of data media** you need to deal with. Paper, CDs, magnetic storage, electronic storage, hard drives etc.
4. **Now connect data media and security level.** You can now use this information to select the appropriate document shredder.

Scope of application	Protection class	Security level DIN 66399	Shredder material	Model	
Department 1 up to 15 persons Per cycle: up to 70 sheets Collection volume: up to 205 litres	1	P-2 / O-2 / T-2 / E-2		SECURIO: P44i

Much easier than you would expect: Data protection with HSM!

Now find the right document shredder for your requirement.

This is how to find the right document shredder:

Protection class	Security level					
	P	F	O	T	H	E
1	P-1	F-1	O-1	T-1	H-1	E-1
	P-2	F-2	O-2	T-2	H-2	E-2
	P-3	F-3	O-3	T-3	H-3	E-3
2	P-4	F-4	O-4	T-4	H-4	E-4
	P-5	F-5	O-5	T-5	H-5	E-5
	P-6	F-6	O-6	T-6	H-6	E-6
	P-7	F-7	O-7	T-7	H-7	E-7

Shredding different types of data media securely.

You have documents with protection class 2 which need to be shredded. You select security level 4, as this involves strictly confidential personal data. The information is on paper and on DVDs, i.e. data media in the P and O categories. You need a document shredder which can shred both media types. The right security level for paper is P-4, and for DVDs O-3. To find the right document shredder, look for the combination P-4/O-3.

HSM offers a great range of document shredders worldwide – for virtually every application area.

Do you need a compact document shredder to use at home, main shredder for a busy office, a complete waste disposal system for large quantities of documents or a shredder for your digital / optical data media? In the HSM SECURIO, Pure, shredstar and Powerline

product lines including hard drive shredders, you will find the right machine for your requirements. In any price category, at any security level, at any performance class and for any data storage medium.

HSM SECURIO / HSM SECURIO with autofeed:
Design and security work together.

HSM Pure:
The modern way of shredding data media.

HSM shredstar:
The right paper shredder for small amounts.

HSM Powerline:
Shred hard drives reliably.

HSM SECURIO document shredders

Are you looking for quality, durability and design? Then you have found the perfect answer with HSM SECURIO document shredders. You can expect the highest level of Made in Germany quality here. With a three year warranty on all HSM SECURIO models. Regardless of whether you have chosen the AF-series with automatic paper feed, the C-series for the home office, the B-series for the workplace or the P-series with IntelligentDrive for professional use: you are protected with shredders from HSM!

Excellent environmental consideration: HSM SECURIO document shredders

HSM shredders are characterised by low energy consumption, durable design and the avoidance of materials that are harmful to the environment. These were the reasons that document shredders from the HSM SECURIO product range (except HSM SECURIO P36i, P40i, P44i) were awarded the Blue Angel certificate. We are particularly proud of this.

HSM SECURIO
IntelligentDrive

The HSM SECURIO P-series document shredders

Innovative and convenient: with IntelligentDrive.

Impressively flexible.

Depending on your individual requirements, select one of the three customised operating modes:

Silent – particularly quiet,

Performance – maximum performance,

Standard – optimum throughput.

Simply intelligent.

Innovative technology simplifies operation and prevents faults. In particular, the intelligent jam prevention function ensures easy and trouble free operation.

Noticeably long-lasting.

Benefit from our highest "Made in Germany" quality standards, thanks to products which are characterised by a long life expectancy, particularly high energy savings, competent service and reliable warranty terms.

Inspiringly intuitive.

The self-explanatory menus and high resolution touch display give you maximum user-friendliness.

HSM SECURIO document shredders with automatic paper feed

Innovative, convenient and time-saving. The autofeed shredders of the AF-series with Nanogrip Technology combine functionality and operating convenience. For reliable and easy destruction of document stacks and single sheets.

Nanogrip Technology

The document shredders with autofeed have specially developed intake and transport rollers which use Nanogrip Technology. This enables sheet after sheet to be pulled in securely from the stack of paper.

Time-saving and easy to use

Paper stacks of up to 500 sheets can be put into the magazine and destroyed automatically.

Lock-and-Go function (AF300 / AF500)

It is possible to secure the paper stack inserted into the magazine against unauthorized access by using the Lock-and-Go function.

HSM SECURIO AF150 document shredder with automatic paper feed

The simple and convenient method of data destruction in the workplace. The document shredder with an automatic paper feed shreds stacks of paper of up to 150 sheets as well as single sheets of paper effortlessly whilst saving you time.

- High quality materials and "Made in Germany" quality for security and durability. With 3 years warranty.
- Cutting rollers made of hardened solid steel.
- Reliable and time-saving shredding of stacks of paper.
- Powerful motor allows for continuous operation.
- Nanogrip Technology for reliable sheet intake.
- Useful dual function: manual paper feeding during autofeed stack processing.
- Blue Angel: the document shredder was awarded this for its sustainability.
- EcoSmart: exceptionally low power consumption of 0.1 Watts in stand-by mode.
- Automatic reverse eliminates paper jams.
- Quiet operation minimises noise development in the workplace.
- Multifunction element for intuitive operation.
- Light barrier for automatic start/stop.
- Removable waste container for effortless emptying.
- Level indicator through inspection window.
- Mobile on castors.

HSM SECURIO document shredders for the department

Data destruction at the highest level. The shredders in the Professional series are equipped with the impressive and innovative IntelligentDrive motor and operating technologies – up to 40 % more performance, intelligent prevention of paper jam and a reduced operating noise level. Perfect for large working groups of up to fifteen people.

Drive and operating concept IntelligentDrive

The innovative IntelligentDrive motor and operating technology offers Silent, Standard and Performance operating modes for destroying data efficiently and conveniently.

Separate CD cutting unit 4 x 7 mm or OMDD cutting unit 2 x 2 mm

The separate media cutting units with collecting bag shred CDs/DVDs, credit and customer cards as well as discs into small particles. The shredded material can easily be disposed of as it is already pre-sorted.

Integrated automatic oiler

This maintenance friendly document shredder has an integrated automatic oiler which ensures consistently high cutting capacity.

HSM SECURIO P36i document shredder

Top class, professional data destruction! This document shredder impresses with its innovative IntelligentDrive motor and operating technology and incorporates a touch screen display. Perfect for large working groups of up to fifteen people.

- High quality materials and "Made in Germany" quality for safety and durability. With 3 years warranty.
- Cutting rollers made of hardened solid steel.
- Document shredders with particle cut have an integrated automatic oiler.
- Intuitive operation and menu selection via the high resolution touch display.
- Powerful motor allows for continuous operation.
- High degree of energy saving due to stand-by and automatic switch-off.
- The device automatically switches off if pressure is applied to the safety element.
- Intelligent paper jam prevention. The machine recognises very quickly if too much paper has been fed in and reacts autonomously.
- Light barrier for automatic start/stop.
- Mobile on castors.
- Convenient removal and emptying of the removable reusable collecting bag.
- The button lock feature prevents unintentional use.
- High quality wooden floor cabinet with door.
- Level indicator through inspection window.

Trust is good, quality is better.

We deal with important company or confidential data on a daily basis. We've been trained to handle personal data and know how important it is to shred old documents which are no longer required. Preferably wherever the documents are. In the workplace, company, administration department or even at home.

HSM Pure document shredders deal with everything reliably and simply. The high quality materials and proven "Made in Germany" quality guarantee security and a long operating lifetime.

Maximum performance in operation. Energy saving in stand-by mode.

The HSM Pure shredders are impressively powerful in operation and, thanks to the intelligent energy-saving management system, very economical in stand-by mode.

HSM Pure document shredders for the home or the small office

Unbelievably compact. Always a top performance. HSM Pure document shredders for the home or the small office. For people who have to shred confidential documents at their desks.

Easy to operate

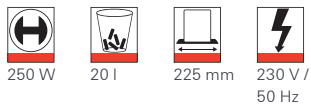

There is no easier way to operate a shredder: it starts automatically when the paper is fed in.

Simple emptying (120 / 220)

To empty the waste container, the housing top can be easily removed – a practical, recessed grip facilitates easy handling.

Effortless emptying (320)

The waste container can be easily removed and emptied.

HSM Pure 120 document shredder

Data protection begins at the desk. The compact document shredder shreds personalised advertising, correspondence of all kinds, receipts and payment documents safely and reliably.

- High quality materials and "Made in Germany" quality for security and durability.
- Cutting rollers made of hardened steel with lifetime warranty.
- Quiet operation minimises noise development in the workplace.
- Low power consumption in stand-by mode.
- Paper feed with overload protection reduces paper jams.
- The device automatically switches off if pressure is applied to the safety element.
- Practical automatic start/stop.
- Effortless emptying of the waste container via the removable housing top.
- Timeless machine design in trendy white.

HSM Pure document shredders for the workplace

Simple elegance. Absolute security. The HSM Pure document shredders for the workplace. For professional users who shred important business documents or personal data in the office or in small working groups.

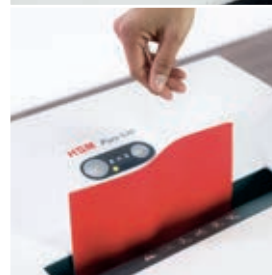

Specially hardened solid steel cutting rollers

The specially hardened cutting rollers made from solid steel are impervious to staples and paper clips and guarantee a long service life.

Clearly arranged operator control panel

The functional and clearly arranged operator control panel shows the operating state.

Automatic start/stop

The device starts automatically when fed with paper and automatically stops after shredding is complete.

HSM Pure 420 document shredder

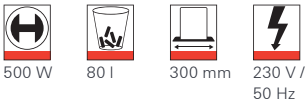

Made for everyday office use. The document shredder with a powerful motor and quiet continuous operation shreds even large quantities of paper easily and reliably.

- High quality materials and "Made in Germany" quality for security and durability.
- Cutting rollers made of hardened solid steel with lifetime warranty.
- Powerful motor allows for continuous operation.
- Quiet operation minimises noise development in the workplace.
- Low power consumption in stand-by mode.

HSM Pure document shredders for the department

Convincingly powerful. Unbelievably economical. The HSM Pure document shredders for the department. For multiple users who process large quantities of data media with sensitive, company or confidential information frequently and regularly and need to shred the data securely and reliably in-house.

Continuous operation and low noise

Reliable operation even for continuous loads. Optimum design of cutting and drive components as well as the closed gear mechanism ensure low noise.

Automatic paper jam prevention

The machine recognises quickly whether too much paper has been feed in and reacts autonomously.

Convenient emptying

Convenient removal and emptying of the reusable collecting bag.

HSM Pure 740 document shredder

The powerful shredder for the department. The sturdy and powerful cutting roller with a wide input width for paper up to A3 impresses with its high cutting performance and low noise level in continuous operation.

- High quality materials and "Made in Germany" quality for security and durability.
- Cutting rollers made of hardened solid steel with lifetime warranty.
- Powerful motor allows for continuous operation.
- Quiet operation minimises noise development in the workplace.
- Low power consumption in stand-by mode.
- Paper feed with overload protection reduces paper jams.
- The device automatically switches off if pressure is applied to the safety element.
- Light barrier for automatic start/stop.

for the home or small office

HSM shredstar document shredders

Data privacy concerns everyone! So shred sensitive data at the office or at home with a document shredder from the HSM shredstar product line. These devices are characterised by their compact and modern design, their high performance level and ease of use with an unbeatable price-performance ratio.

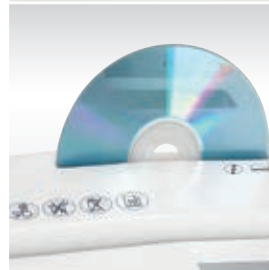

HSM shredstar document shredders for the home or small office

Stylish – good value – secure: the HSM shredstar document shredders for the home or small office. For people who want to shred documents securely.

Easy to operate

Light barrier for automatic start/stop.

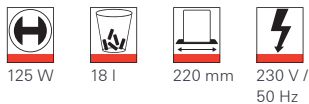

Separate CD cutting unit

The separate CD cutting unit easily shreds CDs and DVDs, credit and store cards. The shredded material is sorted into the separate CD waste container and can be disposed of separately.

Inspection window

The filling level of the waste container can be seen at all times through the inspection window.

HSM shredstar X5 document shredder

Data protection for the home or the small office. This modern and compact particle cut document shredder with a separate CD cutting unit shreds data in the workplace.

- Automatic reverse eliminates paper jams.
- Separate CD cutting unit with own waste container for sorted disposal.
- Quiet operation minimises noise development in the workplace.
- LED indicator shows the device's operating status: Power, Overload, Overheat.
- Light barrier for automatic start/stop.
- Level indicator through inspection window in the waste container.
- Effortless emptying of the waste container via the removable housing top.

HSM shredstar document shredders for the workplace

Stylish – good value – secure: the HSM shredstar document shredders for the workplace. For people who need to shred paper documents and digital media securely.

Functional and clear

LED indicator shows the device's operating status: Power, Overload, Overheat, Bin full, Door open.

Separate CD cutting unit

The separate CD cutting unit easily shreds CDs and DVDs, credit and store cards. The shredded material is sorted into the separate CD waste container and can be disposed of separately.

Removable waste container

The waste container can be easily removed and emptied.

HSM shredstar X13 document shredder

User-friendly and functional. This particle cut document shredder on castors in a modern design has an anti-paper jam function. Suitable for up to 5 people.

- Automatic reverse eliminates paper jams.
- Quiet operation minimises noise development in the workplace.
- Automatic detection and shutdown if the waste container is full.
- Light barrier for automatic start/stop.
- Level indicator through inspection window in the waste container.
- Can be moved on castors.

When ordering please also consider the special lubricating oil for the cutting head (see page 49) which ensures a constantly high cutting capacity over the long term for the HSM shredstar document shredders. All specifications are listed without guarantee. Technical and design modifications reserved.

HSM Powerline document shredders

Data privacy in a big way – the HSM Powerline: the robust technology of the 400 V three-phase devices is specially designed for a large throughput and long total operating time. The top of the range model HSM Powerline FA 500.3 processes bound documents and folders up to 550 sheets at a time. The powerful large devices are perfect for large archives or as a central station for document shredding.

Shredders for the centralised destruction of data media

Convenient and simple. HSM Powerline shredders, designed for heavy-duty applications destroying large quantities of data media.

Specially hardened solid steel cutting rollers

The induction-hardened, solid steel cutting rollers are robust and ensure a high level of durability!

Automatic reverse

The automatic reverse reduces paper jams and ensures smooth operation.

Operating safety with emergency stop rail

Safety is a high priority for HSM and so we have incorporated an emergency off safety bar on the loading table, which stops the device when pressure is applied.

Low space requirement and narrow transport width

Thanks to the integrated rollers and compact size, the machine can be easily set up at the installation site and saves space.

Extension of the loading table

The optional extension to the loading table provides more space to store materials.

Removable trolley

The device has a removable trolley (easy to get out of the machine) and the collecting bag itself can be re-used.

Discharge conveyor belt

The discharge conveyor belt makes the collection of the shredded material easy and convenient. Any standard container can be used to collect the material at the end of the conveyor belt.

For shredding large quantities independently!

The HSM shredder baler combinations
in operation.

HSM shredder baler combinations

The shredder baler combinations are complete, compact waste disposal stations. They provide data security up to security level P-5 and compress the shredded material into bales, which can be easily transported and recycled. The HSM shredder baler combinations are built for shredding large quantities.

Compact disposal stations for industrial applications

Convenient and economic. The HSM shredder baler combinations are for heavy-duty applications shredding large quantities of data.

Specially hardened solid steel cutting rollers

The induction-hardened, solid steel cutting rollers are robust and ensure a high level of durability!

Energy-efficient IE3 motor

The powerful motors with chain drive are low on wear, resistant and guarantee a long service life. They guarantee reliable operation with maximum throughput – even during continuous operation.

Operating safety with emergency stop rail

Safety is a high priority for HSM and so we have incorporated an emergency off safety bar on the loading table, which stops the device when pressure is applied.

User safety through emergency off switch

It may be necessary to stop the machine immediately so we have equipped the device with an emergency off switch.

Bale weight can be manually set

The bale weight is variable and depends on your requirement.

Bale removal trolley

The removal trolley allows for the easy removal and disposal of the compact bales.

Simple commissioning

The combination can be commissioned very easily using Plug-and-Play. The conveyor belt-shredder can therefore be combined with a baling press at any time.

HSM SP 4040 V shredder baler combination

This compact combination of the FA 400.2 conveyor belt document shredder and a vertical baling press is designed for the professional destruction of large quantities of documents, which are then compressed into bales of up to 35 kg.

- High quality materials and "Made in Germany" quality for safety and durability.
- Cutting rollers made of hardened solid steel.
- Convenient material feeding via non-slip conveyor belt.
- Continuous operation is possible thanks to the powerful motor with a chain drive.
- Automatic reverse eliminates paper jams.
- Light barrier for automatic start of the compression process.
- Shredder material is compressed into compact bales and can be cleanly disposed of either in a box or waste bag.
- Practical removal trolley for the easy removal of bales.
- Manual oiler for consistently high cutting capacity.
- User safety through emergency off switch.
- Functional operator control panel with LED indicator.
- Mobile on castors, with parking brake.

HSM SP 5080 shredder baler combination

This powerful combination of the FA 500.3 large document shredder and a counterplate baling press provides for data security in archives and compresses the shredded material into bales of between 40 and 80 kg.

- High quality materials and "Made in Germany" quality for safety and durability.
- Cutting rollers made of hardened solid steel.
- Convenient material feeding via non-slip conveyor belt.
- Continuous operation is possible thanks to the powerful motor with a chain drive.
- Automatic reverse eliminates paper jams.
- Simple commissioning of the combination using Plug-and-Play.
- Light barrier for automatic start of the compression process.
- Shredder material is compressed into compact bales and can be cleanly disposed of in a waste bag.
- The bale weight is variable depending on the requirement.
- Automatic oiler provides for consistently high cutting capacity.
- User safety through emergency off rail.
- Multifunction element for intuitive operation.
- Mobile on castors, with parking brake.

HSM SP 5088 shredder baler combination

With this waste disposal station, HSM combines the FA 500.3 large document shredder with a channel baler press. It is therefore perfect for use in archives or central stations for shredding large quantities of documents, which are then compressed into bales of up to 90 kg.

- High quality materials and "Made in Germany" quality for safety and durability.
- Cutting rollers made of hardened solid steel.
- Convenient material feeding via non-slip conveyor belt.
- Continuous operation is possible thanks to the powerful motor with a chain drive.
- Automatic reverse eliminates paper jams.
- Simple commissioning of the combination using Plug-and-Play.
- Light barrier for automatic start of the compression process.
- Shredder material is compressed into compact bales, which are manually tied off with three baler straps and can also be disposed of cleanly in a waste bag.
- The bale weight is variable depending on the requirement.
- Automatic oiler provides for consistently high cutting capacity.
- User safety through emergency off rail.
- Multifunction element for intuitive operation.
- Mobile on castors, with parking brake.

Powerful and reliable!

Shredding electronic data with the hard drive shredder HSM Powerline HDS 150.

Shredding electronic data with the hard drive shredder HSM Powerline HDS 230.

HSM Powerline hard drive shredders

Take care when disposing of digital storage media! Huge amounts of confidential information are stored on our computers, USB sticks, magnetic tapes, CDs, DVDs and Blu-ray discs, credit cards and loyalty cards. But what happens to these storage devices when they are no longer required? The solution is mechanical destruction! The HSM Powerline hard drive shredders shred digital and magnetic media into tiny particles, making recovery practically impossible. Safe and efficient to use, data protection compliant.

Specially hardened solid steel cutting rollers

The induction-hardened solid steel cutting rollers are low on wear, resistant and guarantee a long service life.

Discharge conveyor belt

The shredded material is carried away on a conveyor belt and can be collected in any standard container.

Energy-efficient IE3 motors

The powerful motors with chain drive are low on wear, resistant and guarantee a long service life. They guarantee reliable operation with maximum throughput – even during continuous operation.

Low maintenance and service-friendly

The sophisticated design allows repairs and maintenance to be made easily.

HSM Powerline HDS 150 hard drive shredder

The HSM Powerline HDS 150 hard drive shredder destroys digital media devices in a safe and economical way – and is data protection compliant as well.

- High quality materials and "Made in Germany" quality for safety and durability.
- Cutting rollers made of hardened solid steel.
- Hard drive shredder with 230 V power supply in a compact and modern design.
- Very suitable for the decentralised destruction of a smaller quantity of data media.
- Powerful, energy-saving power unit enables long operation at a low noise level.
- Low maintenance due to closed direct drive unit.
- An automatic reverse eliminates material jams.
- Data media can be processed at a convenient working height.
- Different functional modes for the various types of material and maximum throughput.
- Removable waste container for effortless emptying.
- Multifunction control panel for intuitive operation.
- Mobile on castors, with parking brake.

HSM ProfiPack packaging machines

From waste to packaging material. The packaging machine is a brilliant solution for all shipping and storage areas. It perforates used cardboard or bolsters it up and makes universally usable packaging material which is as good as new. This saves costs and, at the same time, is a sensible and practical contribution to environmental protection.

From waste to packaging material

Used cardboard is made into high-quality packaging material.

Packaging material in a single operation

Trimming and padding in a single operation.

Specially hardened solid steel cutting rollers

Specially hardened HSM cutting rollers ensure absolutely precise cutting.

High-quality packaging material

Padding in exactly measured widths.

Modern and intuitive – www.hsm.eu A new look HSM website!

An improved search function, comprehensive marketing materials, an enhanced product finder and a modern design are just a few innovations of the new HSM website which also has a user-friendly interface for intuitive navigation. Explore the site and experience a new way of accessing HSM information.

The innovations at a glance

Product advisor:

Select the application area, the data protection requirement or safety level, the number of sheets or the volume or other functions and a selection of suitable shredders will be displayed.

Data sheet generator/product comparison:

For each product, you can generate and download an informative data sheet in PDF format. Individual shredders can also be compared with one another and the result can then be downloaded.

Protected Partner Area:

Through your eXtraWeb log-in you have access to the protected partner area and to extensive marketing materials such as pictures, videos, brochures, etc.

Service portal:

In case of a complaint, we are always available. Trade partners as well as end consumers can contact the HSM customer service directly via the service form at www.hsm.eu/uk/service.

Responsive Design:

The graphical page layout is automatically altered dependent on the size and requirements of the device on which you are accessing the website. The website is therefore easily accessible via any terminal and can be intuitively navigated from a mobile.

Notes on the technical details

Document shredders:

Cutting type:	The material is shredded into either strips or particles.
Cutting size in mm:	Dimension of the strips or particles of the shredded material (depending on the paper quality).
Cutting capacity in sheets 80 g/m ² :	The maximum number of sheets (A4, 80 g/m ²), fed lengthways, which can be cut in one cycle. The performance data is determined when the motor is cold and the cutting device is freshly oiled. A weaker mains voltage or a different mains frequency to the one specified could result in less sheet capacity and increased noise during operation. The sheet capacity can vary depending on the structure and properties of the paper and on the way it enters. The performance data is calculated in 80 g/m ² .
Security levels DIN 66399:	According to DIN 66399 1-3
OMDD:	The OMDD (Optical Media Destruction Device) cutting unit shreds CDs and DVDs and is recommended for shredding confidential information by the Federal Office for Information Security.
Intake/working width in mm:	Maximum effective width of the feed opening.
Motor:	Max. power consumption of the shredder for cutting capacity with sheets of 80 g/m ² . Rated power of document shredder drive motor.
Voltage/frequency:	AC mains supply.
Dimensions (W x D x H):	External dimensions of the machine when set up for operation.
Weight in kg:	Net weight of the machine without packaging.
Container/collection volume:	Volume of waste container or collection capacity for cut material before the machine switches off.

Shredder baler combinations:

Pressing power:	Piston cylinder surface multiplied by the maximum hydraulic pressure (theoretical value).
Motor:	Rated power of document shredder and baling press drive motors.
Max. bale size (W x H x L):	The length of the bales varies depending on the expansion force of the compressed material.
Dimensions (W x D x H):	External dimensions of the machine when set up for operation.
Weight in kg:	Net weight without packaging, loaded material, feeding system or options.

Packaging machines:

Effective width in mm:	The maximum effective width of the feed opening.
Infeed height in mm:	Height of the intake opening.
Cutting capacity:	The number of layers of cardboard which can be cut in one cycle.
Cutting speed in mm/s:	This is calculated on the basis of the external diameter and speed of the cutting rollers in idle operation.
Motor:	Max. power consumption of the machine for cutting capacity / in layers.
Voltage/frequency:	Three-phase/alternating current power supply.
Dimensions (W x D x H):	External dimensions of the machine when set up for operation.
Weight in kg:	Net weight of the machine without packaging and options.

Hard drive shredders:

Cutting capacity:	Max quantity of hard drives which can be shredded in one hour.
Cutting size in mm:	The dimensions of the particles that resulted from shredding the material.
Motor:	Rated power of hard drive shredder drive motor.
Voltage/frequency:	Three-phase/alternating current power supply.
Dimensions (W x D x H):	The external dimensions of the machine when set up for operation.
Weight in kg:	The net weight of the machine, without packaging and options.

Shredding properly for your protection

HSM – the company

Shredding and Compressing.

Since 1971, HSM has been pursuing a clear strategy – a consistent commitment to “Made in Germany” quality. This product and service quality is the key to our success in both the office technology and environmental technology business sectors. As a specialist in products and services for data protection as well as technologies for improving logistics and recycling processes, HSM is one of the world’s leading providers in these sectors.
