way to shred

Why Shred?

Identity fraud is a risk to all of us, both as individuals and as businesses, simply because we deal with so many pieces of information on a daily basis. To criminals, a discarded bank statement or photocopy of a passport could be enough to allow them to start building up a picture of you, your customers or your business and eventually can lead to them stealing this identity they have recreated. Despite increasing awareness of the threat of identity fraud, data breaches are still a frequent occurrence. Shredding all confidential paper waste is strongly advised to ensure sensitive documents don't fall into the wrong hands; to protect identities and safeguard reputation.

51% of SMEs say they either don't have or are unsure of the presence of a comprehensive company policy to protect people's identities

Benefits Of On-Site Shredding

- Instant peace of mind from the **immediate** document disposal made possible with a shredder nearby your desk
- Safer and more **secure** as documents do not have to be stored prior to disposal off-site
- **Cost effective** over the long term as it only requires a one off investment rather than continual, ongoing payments

Choosing the right shredder...

1 Where will the shredder be used?

Fellowes have made selecting the right model easy, according to run time, where the shredder will be used and the security level. Consider the following when selecting the most appropriate shredder for your needs or the shredder selector and shredder showcase on fellowes.com will walk you through to find the best shredder to suit your needs.

COMMERCIAL

Designed for multiple users and shared workspaces, such as printing / copy areas and open plan offices.

Number of Users
5 or more
Run Time
60 mins - Continuous
Usage
Heavy

SMALL OFFICE / HOME OFFICE

Designed for 1-3 or 3-5 users at the deskside or in the small office.

Number of Users
1-3 or 3-5
Run Time
Up to 45 minutes
Usage
Medium / Heavy

PERSONAL

Designed for 1-3 or 3-5 users at the deskside or in the small office.

Number of Users
1
Run Time
Up to 8 minutes
Usage
Light / Moderate

2 What level of security is required?

A strip cut shredder is ok, but it is recommended to shred with at least a cross cut shredder (DIN P-3 or P-4), which will shred each A4 sheet of paper up to 410 pieces. The images give examples of the levels of protection available, from the most basic strip-cut to the dust-like particles of the micro-cut shredders. DIN levels P-3 - P-5 should be suitable for the majority of users.

3 What additional features will make the job easier?

Eliminates paper jams AND powers through tough jobs

Blocks jams before they start

Prevents shredding interruptions for jam free operation

Automatically stops and reverses if a paper jam occurs

Stops shredding when hands touch the paper opening

Disables shredder for added safety

Ultra-quiet performance for shared workspaces

Reduces in-use energy consumption and powers down after periods of inactivity

Powers down the machine after 2 minutes of inactivity

Lubricates the cutters automatically

Ideal for high volume shredding. The shredder is always ready for operation

SmartLock™ automatically locks the paper drawer when shredding to prevent access to paper waste

The Fellowes difference...

...advanced protection against paper jams:

- 1) Prevent overfeeding.**
A sensor in the paper entry measures paper thickness to eliminate jams
- 2) Power through misfeeds.**
If paper is misfed into the shredder, the machine will pause and then power through the stack
- 3) Maximise productivity.**
A light bar indicates to the user the extent to which they are shredding below capacity

Fellowes are the only shredder manufacturer to offer advanced safety features on entry level machines.

SafeSense™ Technology automatically stops the shredding process when hands come into contact with the paper entry

Many manufacturers offer a simple sleep mode. **Only Fellowes offer energy savings both in and out of use.** We actively source energy efficient components and prevent energy spikes through our jam prevention technologies.

And of course, we didn't forget the sleep mode! **ENERGY savings system**

The importance of run times...

Run time definition: The period of time for which the shredder will operate without stopping, before a cool-down period activates during which the shredder cannot be used.

A shredder's run time is a feature which can be easily overlooked. Typically run times range from just a couple of minutes on entry-level, occasional use shredders in home environments to continuous duty for large office shredders which mean the shredder is always ready for use. Fellowes shredders are manufactured with longer run times, based on the type of work environment and usage levels that the shredder is designed for. With Fellowes shredders, insufficient run times should never be an issue.

Exceptional quality

Our built to last quality commitment begins with engineering excellence, rigorous testing and superior components to ensure the highest levels of durability, performance and reliability. Behind every Fellowes® shredder is the commitment to offering the highest quality and longest lasting shredder you can buy.

In-house shredding advantages

TIME-SAVING CONVENIENCE

Automatic shredding so you can walk away and focus on other priorities.

LOWER COSTS

No more hidden fees or excessive service charges – you can put that money back into your business!

INCREASED SECURITY

Know who is handling your confidential information so you can help prevent a security breach.

AutoMax™ AUTO FEED SHREDDERS

From every angle AutoMax™ delivers dynamic performance. The intuitive touch screen offers effortless operation. The flat-top horizontal design creates additional workspace. The large capacity bin lets you shred many documents with ease and efficiency. The 500C delayed start feature lets you schedule shredding at your convenience. With AutoMax™ shredders, you can truly just walk away.

Surefeed

Automax™ offers the superior advantage of proprietary SureFeed Technology™ for ease of use, versatility and reliable performance. No more wasting time and effort “preparing” documents, Fellowes® AutoMax™ 500C and 300C do it all! Shred crumpled paper, double sided color printed paper, glossy paper, multiple sheets folded over, paper clips, staples – even junk mail and CD/DVDs. Experience what a true auto feed shredder should be, hands-free and hassle-free.

Jam Guard

Prevents shredding interruptions for jam free operation

Smart Lock

SmartLock™ automatically locks the paper drawer when shredding to prevent access to paper waste

SleepMode

Powers down the machine after 2 minutes of inactivity

Continuous shredding

Ideal for high volume shredding always ready for operation

SilentShred™

Minimises noise disruption in shared working environments

AutoMax™

AUTO FEED SHREDDERS

▶ LOAD

▶ LOCK

▶ WALK AWAY

500C only

AUTOMAX™ 500C ITEM NO: 46522

500 Sheet Shredding Capacity at a time

5+ users

Continuous duty shredding - always ready for use

75 Litre Bin

30,60 and 90 minute delay options for starting jobs even after the end of the work day

Also shreds - staples, credit cards, paperclips, CD's

Warranty: Machine / Cutter - 2/20yr

AUTOMAX™ 300C ITEM NO: 46517

300 Sheet Shredding Capacity at a time

3-5 users

30 Minute Run Time

60 Litre Bin

Shreds 300 sheets in 12 mins

Also shreds - staples, credit cards, paperclips, CD's

Warranty: Machine / Cutter - 2/20yr

FEATURES

- SureFeed Technology™ provides automatic shredding for maximum productivity
- JamGuard System™ prevents shredding interruptions for jam free operation
- SmartLock™ engages with each shred cycle to protect confidential information
- SilentShred™ offers ultra-quiet performance for shared workspaces
- Energy saving Sleep Mode feature shuts down the shredder after 2 minutes of inactivity
- Innovative touch screen technology with back-lit LEDs
- Convenient pull-out drawer for front loading of materials to be shred
- Versatile, flat top for easy office integration and additional storage space
- 3-Start Delay options for starting shred jobs even after the work day (500C only)
- 2-year product and service warranty plus 20-year cutter warranty

MicroShred

SUPERIOR SECURITY SHREDDING FOR THE OFFICE OR DESK SIDE – GREATER PEACE OF MIND!

99 Ms *Also Shreds* 
Small Office Shredder
 • Shreds 12 sheets per pass into 2 x 14mm micro-cut particles (Security Level P-5)
 • SilentShred™ offers ultra-quiet performance for shared workspaces
 • Sleep Mode feature shuts down the shredder after 2 minutes of inactivity

450 Ms & 460 Ms *Also Shreds* 
Small Office / Home Office Shredders
 • Up to 10 times smaller micro-cut particles provide superior protection (Security Level P-5)
 • SilentShred® Technology minimises noise disruption in shared work spaces
 • Patented SafeSense® Technology stops shredding when hands touch the paper entry
 • Separate CD entry and bin for waste separation and recycling

225 Mi *Also Shreds* 
Office Shredder
 • Shreds 12-14 sheets per pass into 2x12mm micro-cut particles (Security Level P-5)
 • 100% Jam Proof system eliminates paper jams and powers through tough jobs
 • SilentShred® Technology minimises noise disruption in shared work spaces
 • Patented SafeSense® Technology stops shredding when hands touch the paper entry

PowerShred

HIGH PERFORMANCE, FEATURE RICH CROSS CUT PROFESSIONAL AND DESKSIDE SHREDDERS

125 Ci *Also Shreds* 
Small Office Shredder
 • Cross-cut shredder (Security Level P-4)
 • 100% Jam Proof eliminates paper jams and powers through tough jobs
 • SilentShred® Technology minimises disruption in shared work spaces
 • SafeSense® Technology immediately stops shredding when hands touch the paper entry
 • Energy savings system reduces in-use energy consumption and powers down after 2 min of inactivity.

225 Ci *Also Shreds* 
Office Shredder
 • Cross-cut shredder (Security Level P-4)
 • 100% Jam Proof system eliminates paper jams and powers through tough jobs
 • SilentShred® Technology minimises disruption in shared work spaces
 • SafeSense® Technology immediately stops shredding when hands touch the paper entry
 • Energy savings system reduces in-use energy consumption and powers down after 2 min of inactivity.
