## *product overview*

# Document shredders HSM Powerline

The robust technology of the 400 V devices is specially designed for a large throughput and long total operating time. As a top model, the HSM Powerline FA 500.3 processes bound documents and folders with up to 550 sheets per cycle. The powerful large devices are perfect for large archives or as a central station for document shredding.

## The advantages:

- The high quality materials and proven HSM „Made in Germany“ quality guarantee you are receiving a safe and durable machine.
- The induction-hardened solid steel cutting shafts are low-wear, durable and ensure a long life, just like the powerful and energy-efficient motor with chain drive. It ensures reliable operation with maximum throughput – even in continuous operation.
- Thanks to the integrated rollers and the compact size, the device can be set up easily and compactly.
- The large document shredders can be simply filled through the loading table, as well as the electric conveyor belt. \*
- You can easily operate the unit and check the operating status via the keypad with LED display (HSM FA 500.3 with multi-function button).
- The automatic return eliminates paper jams and ensures a smooth operation.
- You can easily dispose of the clippings via the pull-out waste container.

\* depending on models

HSM - a reason for every detail.

The HSM Powerline and the HSM shredder baler combinations are made with HSM „Made in Germany“ quality in the German-based HSM factory.

Collection volume in l	290		460 (optional 2 x 230)		530 / 2 x 265			
Suitable for paper and Suitable for Archive/Central Offices								

# HSM Shredder baler combinations

The shredder baler combinations are complete, compact disposal stations. They provide for a data security level up to P-5 and press the shredded material, on the other hand they press the shredded material into handy bales that can be removed easily. The HSM shredder baler combinations are suitable for the destruction of large volumes, such as in archives or for professional document shredding.

## The advantages:

- All paper shredder features correspond to identical models of the HSM Powerline series.
- Through an integrated light barrier, the pressing process is started automatically during shredding. So continuous feeding is possible without interruption.
- Clean handling without loss of particles through solid and compact compressed bales with subsequent ball packaging (packaging and banding).
- High level of user and operational safety.

HSM – a reason for every detail.

Check which protection level your data needs according to the DIN standard 66399. The higher the security level (1-7), the smaller the particle of the shredded material. Join up your relevant media and the security level to choose the appropriate paper shredder.
